

The Lean Startup — Revision Booklet

Eric Ries • 2-page rapid revision • Concepts → Mental model → Recall questions

30-second mental model: Read the bold chain below, then try to explain the book without looking at the page.

Assumption → MVP → Measure → Learn → Pivot/Persevere

CORE CONCEPTS

- Core loop: Build → Measure → Learn.
- MVP = smallest experiment that tests an important assumption.
- Validated learning = evidence that changes what you do next.
- Test the riskiest assumption first.
- Use behavior-based metrics, not vanity metrics.

CORE CONCEPTS — CONTINUED

- Pivot = change strategy based on evidence; Persevere = continue when evidence supports it.
- Innovation accounting connects experiments to measurable progress.
- Short feedback loops reduce wasted effort.
- Optimize for learning per unit of time/resources.

The Lean Startup — Active Recall

Close the book. Answer these from memory. Then revisit only the concepts you missed.

1. What is my riskiest assumption?

2. What is the smallest test that can challenge it?

3. What metric would genuinely change my decision?

One-sentence teach-back: Explain the entire book to someone in one sentence.

Top 3 ideas I will apply: 1) _____ 2) _____ 3) _____
